

# ESPON 4.1 Data Navigator

---

- Inventory of national data collection:
  - Regional data, preferably for NUTS III regions
  - For ESPON space: EU 15 + 12 accession countries + 2 neighbouring countries
  - To be used as research instrument by ESPON projects in order to improve data collection for the common platform
    - Description of the data sets (e.g. features, structure)
    - References of the data sets (e.g. publications, contact)
  - Outcome – constantly updated – published under [www.espon.eu](http://www.espon.eu)

# ESPON 4.1 Data Navigator

---

- Themes to be covered (I):
  - Spatial typologies, geography
  - Population developments and movements
  - Employment, unemployment, commuting and labour market
  - Wealth, production, enterprises and investment
  - Transport, telecommunication and information society
  - Research and development
  - Utilities and energy
  - Household oriented infrastructure, e.g. health, education, vocational training, amenities

# ESPON 4.1 Data Navigator

---

- Themes to be covered (II):
  - Land use, settlement structure
  - Environment, e.g. water, air, waste
  - Agriculture, forestry and viticulture
  - Social situation, income and expenses
  - Housing, equipment, housing prices and market
  - Cultural sites, e.g. theatres, arts, museums
  - Tourism: demand, infrastructure, performance
  - Public sector
  - Elections

# ESPON 4.1 Data Navigator

---

- Data Navigator Luxembourg:
  - Data scope:
    - ~ 400 data sets for regional data in Luxembourg
    - Main contributions by
      - Statec (Mr. Zacharias) and official statistics,
      - Datur (Mr. Wagner, Mr. Peters, Mr. Tholl) and
      - CEPS (Mr. Bousch)
    - Concise and extensive inventory of Luxembourg data collection
  - Data access:
    - General: easily accessible publications (e.g. statistical yearbook, rapport d'activité)
    - Resp. Statec: well elaborated web-site with data request function under [www.statec.lu](http://www.statec.lu)

# ESPON 4.1 Data Navigator

---

- Data Navigator Luxembourg:
  - Data quality:
    - Only little variations in data gathering methods and classifications
    - Variation in regional units, e.g. touristic regions
    - R&D data not fully developed
  - Data availability:
    - Most data refer to NUTS III-level = national level or NUTS V-level = municipal level
    - Regional level (NUTS VI) not yet fully established
    - Data gaps mainly concerning the requirement of regional data, e.g. on the fields of labour market, business activities, infrastructure, cultural inventories, telecommunication

# ESPON 4.1 Data Navigator

---

## ■ Conclusions:

- Data Navigator is extra helpful to meet the ample demand of regional data provided by national statistics for ESPON projects
- Demand of the ESPON projects goes far beyond:  
more European-wide harmonised data concerning e.g.
  - Data gathering methods and procedures
  - Definitions of data sets
  - Classifications of data, e.g. ISCED 97
  - Spatial completeness
  - Data storage
